Alabama

Last reviewed: June 2024

Template A

Calculation starts with Federal AGI less itemized or standard deduction less personal & dependent exemptions.

Social security

Exclusion from gross income allowed for all benefits. Alabama income starts at the Federal level and, therefore, no adjustment is needed. However, Social Security income is included for Federal purposes in certain cases (such as if earned income is too high); this leads to the inclusion of Social Security income in state AGI. This needs to be excluded as Social Security is not taxable for Alabama purposes.

Unemployment income

Unemployment income is not taxable for Alabama purposes and should be deducted from Federal AGI in the Alabama state income calculation.

Standard/Itemized deductions

Use the greater of the standard or itemized deduction amounts as described below (not indexed).

1. Standard

- Married, filing jointly: Starts with \$7,500 until AGI of \$25,500 and is then reduced by \$175 for every additional \$500 of AGI until the deduction is reduced to \$5,000.
- Married, filing separately: Starts with \$3,750 until AGI of \$12,750 and is then reduced by \$88 for every additional \$250 of AGI until the deduction is reduced to \$2,500.
- Head of Household: Starts with \$4,700 until AGI of \$25,500 and is then reduced by \$135 for every additional \$500 of AGI until the deduction is reduced to \$2,500.
- Single: Starts with \$2,500 until AGI of \$25,500 and is then reduced by \$25 for every additional \$500 until the deduction is reduced to \$2,500.

2. Itemized

- Use the Total itemized deductions from the Federal Tax Return less miscellaneous deductions.

Exemptions

This deduction amount includes both a personal exemption as well as a dependent exemption.

1. Personal exemption (amounts for 2022, not indexed):

- Single & Married, filing separately: \$1,500
- Married, filing jointly & Head of Household: \$3,000 Dependent exemption: this would be the same amount of dependents claimed on the Federal return. The deduction amount per exemption is determined by Alabama AGI:
- AL AGI \$0-\$20,000: exemption amount is \$1,000 per; AL AGI \$20,001-\$100,000: Exemption amount is \$500 per; AL AGI >\$100,000 the exemption is \$300 per.

Arizona

Last reviewed: June 2024

Template A

Arizona income starting point is Federal AGI.

State additions

Tax-free income

Tax-free asset income for non-Arizonian municipals

State subtractions

Certain exemptions, as follows (amounts are not indexed):

- \$2,300 for each family head who is 65 or over.
- \$1,500 for each family head who is blind (*Not supported in Digital Planning by InvestCloud*).
- \$2,300 for each dependent who is under 19 or is 19 to 24 years of age and is a student.

Social Security

Federally taxable Social Security income is deducted from Arizona Income.

Standard/Itemized deductions

The larger of the standard deduction or total itemized deductions.

1. Standard

Year / Filing status	Single & MFS	MFJ & HOH (until 2019)	HOH (effective 2019)
2024	\$13,850	\$27,700	\$20,800

- Going forward from 2019, the Arizona standard deduction will match that of the federal standard deduction.
- Itemized Deductions: Same as Federal itemized deductions (no adjustment for state taxes). There are differences, but none that are applicable to Digital Planning.

Personal exemptions

Personal Exemptions (amounts are not indexed)

Repealed in 2019. Going forward, the Arizona standard deduction will match that of the federal standard deduction.

Taxable income

In all Template A states:

State Taxable Income = Federal AGI + State Additions – State Subtractions – Standard/Itemized – Personal Exemptions

Arkansas

Last reviewed: June 2024

Template A

Non-Arkansas municipals are added back.

State subtractions

Social Security

Exclusion from gross income allowed for all benefits. Arkansas income starts at the Federal level and, therefore, no adjustment is needed. However, Social Security income is included for Federal purposes in certain cases (such as if earned income is too high); this leads to the inclusion of Social Security income in state AGI. This needs to be excluded as Social Security is not taxable for Arkansas purposes.

Unemployment income

Unemployment income is not taxable for Arkansas purposes and should be deducted from Federal AGI in the Arkansas state income calculation.

Standard/Itemized deductions

Use the greater of the standard or itemized deduction amounts as described below (not indexed).

1. Standard

- **2015-2024+:**
\$2,200 for Single filers, \$4,400 for Joint filers (not indexed)
Head of Household: \$2,200, Married Filing Separately \$2,200 each.

2. Itemized

- Itemized deductions are the total amount of Federal itemized deductions less Arkansas state income taxes paid.

Tax credits

Non-refundable

Exemption credit:

- General – This figure is not a deduction from income to arrive at taxable income. Rather, it is a non-refundable credit for Arkansas purposes.
- Use the number of exemptions: one for each head, one for each dependent, and one for each head that is 65+ years old and/or blind, multiply this figure by \$29 (2024). This is a non-refundable credit that can be used to offset total tax down to \$0 owed.

Template A

Definition of dependent matches the federal definition.

State additions

Tax-free income

Tax-free asset income for non-Californian municipals

Other

California does not conform to the subtraction of HSA contributions. Therefore, Digital Planning by InvestCloud will add back these contributions into gross income.

State subtractions

Social Security

Federally taxable Social Security income.

Other

Unemployment Insurance.

US obligations

Interest on US obligations (T-Bills, US Savings Bonds).

Standard/Itemized deductions

Use the greater of the standard or itemized deduction amounts as described below (indexed for inflation).

Template B

State additions

Tax-free income

Tax-free income for non-Colorado municipals interest

State taxes

State tax deduction taken on Schedule A

State subtractions

US obligations

- Interest on US obligations (T-Bills, US Savings Bonds).

Pension and Annuity Subtraction:

- The taxpayer(s) may be eligible to subtract the income earned from a pension or annuity. This item is calculated on a per-person basis even if married. The amounts below are not indexed.
 - If the taxpayer has yet to reach age 55, \$20,000 of the benefit received as a secondary beneficiary due to death of another person may be deductible.
 - If the taxpayer is aged 55 or over, \$20,000 of the total taxable pension/annuity income may be subtracted.
 - If the taxpayer is aged 65 or older, \$24,000 of the total taxable pension/annuity income may be subtracted.

- The following incomes may be included in this subtraction:
 - Payments from an employer plan (401k, etc.)
 - IRA distributions
 - Payments from self-employed retirement accounts
 - Federally taxable Social Security benefits
 - Lump sum distributions from pension or profit-sharing plans
 - Amounts from matured private annuities

Standard/Itemized deductions and exemptions:

- No Colorado deductions as CO taxable income starts from Federal taxable income.

Tax credits

Refundable

- Colorado Child Care/Child Tax Credit
 - Applies to all filing types.
 - Available to taxpayers with Federal AGI below \$60,000 (from 2004-2022, not indexed) who have a federal tax liability.
- Child Care Expenses Credit
 - For 2014, 2015 and before Jan 1 2017 there is a 25% credit up to \$500 for a single dependent, or \$1,000 for multiple dependents:
 - AGI is \$25,000 or less
 - Dependent(s) are age 13 or less in the current tax year
 - This credit is only applicable if the federal credit was not applied in Digital Planning by InvestCloud

Note: If the client received the Federal credit, then only the Colorado Child Care credit would apply (The first one). If no Federal credit is received, then the second one applies. You can't have both.

Tax rates

- All taxpayers are subject to a flat 4.25% tax rate.

Total

- Tax less Tax Credits. Total can be less than \$0.00 due to refundable credits.

- Phase-out: for every additional \$1,000 AGI in all tax brackets, the exemption is reduced by \$1,000. Example: AGI range of \$49,001-\$50,000 for MFJ reduces the exemption by \$2,000 to \$22,000. \$1 over the AGI thresholds above reduces it by \$1,000.

Tax Credits

Non-refundable

- For taxable years commencing on or after Jan 1, 2016, the credit may not exceed \$200.
 - The phaseout on the credit that begins at the following thresholds:
 - Unmarried - \$49,500.
 - Married, filing separately - \$35,250.
 - Head of Household - \$54,500.
 - Married, filing jointly - \$70,500.
 - When income exceeds these thresholds, the credit will generally be reduced by 15 percent for each \$10,000, or fraction thereof, earned in excess of the threshold.
- Personal Tax Credit – Adjusted Gross Income Credit

- Connecticut grants a credit against income based on an individual's adjusted gross income and filing status. This credit is on a declining sliding scale based on income starting at a 75 percent credit.

Tax Rates

- Rates: Beginning with the 2015 tax year, Connecticut taxes individual taxpayers at statutory rates of 2%, 4.5%, 5.5%, 6%, 6.5%, 6.9%, and 6.99% depending on the taxpayer's taxable income and filing status .
- 3% income tax bracket phase-out: The lowest (3%) income tax bracket is phased out. The ranges are specified in the tax rates excel sheet linked above. (Sec. 12-700(a)(8), G.S.).
- Recapture phase-in: For taxpayers whose annual CT AGI exceeds specified thresholds, "recapture" provisions eliminate the benefits they receive from having a portion of their taxable income taxed at lower marginal rates. Under the recapture provisions, taxpayers with higher incomes must add specified amounts to their tax liability figured using the new marginal rates. The recapture requirement is phased in until 100% of the taxpayer's taxable income is effectively taxed at the highest marginal rate (6.99%). (Sec. 12-700(a)(8), G.S.).

Delaware

Last reviewed: June 2024

Template A

Non-Delaware municipals are added back.

State subtractions

Social Security

Exclusion from gross income allowed for all benefits. Delaware income starts at the Federal level and, therefore, no adjustment is needed. However, Social Security income is included for Federal purposes in certain cases (such as if earned income is too high); this leads to the inclusion of Social Security income in state AGI. This needs to be excluded as Social Security is not taxable for Delaware purposes.

Retirement Income

Delaware residents are eligible for an exclusion of retirement income from pensions or qualified liquidations based on age

- \$2,000 for residents aged 60 and under
- \$12,500 for residents aged 60 and older

Standard deductions

Year	Single, MFS, & HOH	MFJ	Additional Deduction (over 65 or blind)
2019	\$3,250.00	\$6,500.00	\$2,500.00
	Not indexed	Not indexed	Not indexed

Note: Digital Planning by InvestCloud does not currently support a way to denote a client is blind so the additional deduction will only apply for a client over age 65

Itemized deduction: same as Federal, except state income tax is added back.

Personal Exemptions

- Delaware offers no personal exemptions. The amount to appear for Personal Exemptions under Delaware Income Tax should be \$0.

Tax Credits

Non-refundable

- Personal credit:
 - One credit of \$110 (not indexed) is allowed for each personal exemption claimed for federal purposes.
 - An additional \$110 (not indexed) is allowed for each head age 60 or over.

Iowa

Last reviewed: June 2024

Template A

Non-Iowa municipals are added back.

State subtractions

Social Security

Exclusion from gross income allowed for all benefits. Iowa income starts at the Federal level and, therefore, no adjustment is needed. However, Social Security income is included for Federal purposes in certain cases (such as if earned income is too high); this leads to the inclusion of Social Security income in state AGI. This needs to be excluded as Social Security is not taxable for Iowa purposes.

Retirement income

- Subtract \$6,000 in retirement plan distributions to individuals at least 55 years of age.

Standard deductions

2022	\$2,210.00	\$5,450.00
2023+	\$0	\$0

Itemized: Same as Federal with Iowa state tax add-back.

Personal exemptions

- Iowa has an exemption credit, but no deduction. This is a non-refundable credit that can reduce the tax owed to, but not below, \$0. The credit is calculated as follows:
 1. Personal credit:
 - a. Single or MFS: \$40
 - b. MFJ or HOH: \$80
 2. Additional personal credit: \$20 for each head over the age of 65 and/or blind.
 3. \$40 per dependent.

- A deduction of \$850 for single filers and a deduction of \$700 for married filers (MFJ & MFS) for:
 - Each head aged 65 or over
 - Each head who is blind Additional amount not yet supported, updated information for all filing statuses will be required when this is supported.
- Itemized Deduction

- There is a new calculation for Kansas itemized deductions. It includes a new calculation as well as a calculation to limit deductions with AGI in certain amounts.

Personal exemption

- Kansas allows the following exemptions:
 - \$2,250 (amounts not indexed) each for
 - self and spouse
 - dependent children under 19
 - dependent children aged 19 to 24 who are students
 - If filing status is HOH add one exemption

Tax credits

Louisiana

Last reviewed: June 2024

Template A

- Non-Louisiana municipals are added back.
- Louisiana tax calculation begins with Federal AGI and then proceeds as follows:

State subtractions

Federal tax

- Subtract the total amount of Federal Income tax from Federal AGI. No cap.

Excess federal itemized deductions

- If the taxpayer itemized deductions for Federal purposes, subtract the excess of the itemized deduction over the Federal standard deduction amount.

Retirement income

- After age 65, annual retirement income of up to \$6,000 dollars is exempt from state income tax. This includes distributions from qualified retirement plans and IRAs. This is eligible for each member over 65.

Social Security

Exclusion from gross income allowed for all benefits. Louisiana income starts at the Federal level and, therefore, no adjustment is needed. However, Social Security income is included for Federal purposes in certain cases (such as if earned income is too high); this leads to the inclusion of Social Security income in state AGI. This needs to be excluded as Social Security is not taxable for Louisiana purposes.

Standard/Itemized deductions

Year	Single & MFS	MFJ & HOH
1999	\$4,300.00	\$7,200.00
2000-2022	\$4,500.00	\$9,000.00
2023+	Not Indexed	Not Indexed

- Itemized
 - Louisiana has no itemized deductions of its own. These are taken into account in state subtractions above.

Personal exemption

- There is no separate personal exemption deduction for Louisiana tax calculation purposes.

Tax calculation

Contrary to other states, Louisiana's 'standard deduction' is applied to the first \$4,500 of income and not the last dollars of income generated. This has the effect of eliminating \$4,500 of the first tax bracket for all taxpayers and not the highest bracket that each individual is in.

Maine

Last reviewed: June 2024

Template A

Non-Maine municipals are added back.

State subtractions

Social Security

Exclusion from gross income allowed for all benefits. Maine income starts at Federal and therefore no adjustment is needed. However, social security income is included for Federal purposes in certain cases (earned income is too high); this leads to the inclusion of Social security income in state AGI. This needs to be excluded as social security is not taxable for ME purposes.

Standard/Itemized Deductions

For Maine filers, the standard or itemized deduction can be used, whichever is greater.

1. Standard

Year	Single	MFJ	HOH	MFS
2013	\$6,100.00	\$10,150.00	\$8,950.00	\$5,075.00

2024	\$14,600.00	\$29,200.00	\$21,900.00	\$14,600.00
2025+	Indexed	Indexed	Indexed	Indexed

Additional standard deduction for age and/or blindness (also same as Federal):

Unmarried (Single or HOH): multiply number of 65+ or blind exemptions by \$1,850 (\$3,500 if both). Add to standard deduction amount in above table

Married (MFJ or MFS): multiply number of 65+ or blind exemptions by \$1,500 (\$2,800 if both). Add to standard deduction amount in above table

2. Itemized:

- Maine's allowable itemized deductions are generally the amount that is used for Federal deductions less any itemized income taxes imposed by this or any other state. In tax years 2023 and after, Maine itemized deductions are limited to \$33,200, adjusted annually for inflation.

Standard/Itemized deduction phase-out

For tax years after 2018, the standard/itemized deduction is phased out as follows (all indexed 2023+):

- Single & MFS AGI = \$85,850.00
- HOH AGI = \$128,750.00
- MFJ AGI = \$171,700.00

The calculation is outlined here:

https://www.maine.gov/revenue/forms/1040/2018/18_item_stand_%20ded_phaseout_wksht_10_2018.pdf.

It works as follows:

1. Take 2022 AGI and subtract the values outlined above depending on tax filing status.
2. Divide the value in 1 from (\$75,000 if single or married filing separately; \$112,500 if head of household; or \$150,000 if married filing jointly)
3. If the value is 1 or more, round it back to 1.
4. Multiple the result of 2 by the Standard Deduction or Itemized deduction for the applicable filing status
5. Subtract the result of 4 from the applicable standard or itemized deduction for the applicable filing status....this is the standard deduction for the year.

Personal Exemptions

- 2016 & 2017: \$4,050
- 2018: \$4,150
- 2019: \$4,200
- 2020 - 2022: \$4,300

Phaseout of Personal Exemption

For tax year 2022, the personal exemption is phased out as follows (all indexed 2022+)

- Single AGI = \$279,500
- MFS = \$167,700
- HOH AGI = \$307,450
- MFJ AGI = \$335,400

The calculation is outlined here:

https://www.maine.gov/revenue/forms/1040/2018/18_pers_exempt_phaseout_wksht.pdf.

It works as follows:

1. Subtract Maine AGI from the phaseout amount listed above
2. Divide the result from line 1 by (\$62,500 if MFS; \$125,000 if single or MFJ or HOH); if above 1 use 1
3. Multiply the result from line 2 by the personal exemption amount (\$4,300 if single HOH or MFS, \$8,600 if MFJ)... this is the Maine personal exemption amount for the year.

Maryland

Last reviewed: June 2024

Template A

Definition of dependent matches the federal definition.

State additions

Tax-free income

- Tax-free asset income for non-Maryland municipals

State subtractions

Other

- Child Care Expenses subtraction
 - This subtraction DOES NOT apply to MFS taxpayers (because this is available to spouses not living together and Digital Planning by InvestCloud assumes they are)
 - If no Dependent Care benefits were received, this subtraction is the minimum of:
 - Child and Dependent Care Expenses or
 - \$3,000 per taxpayer (MFJ is considered one taxpayer) with one dependent or \$6,000 per taxpayer (MFJ is considered one taxpayer) with two or more dependents, made permanent by ATRA
 - If Dependent Care benefits were received (see detailed incomes tab)
 - Two income subtraction
- Two income subtraction
 - If MFJ and both spouses have income subject to MD tax, then subtraction is the lesser of the lower spouse's share of MD income or \$1,200 (not indexed).
 - Does not apply to MFS filers.

Social Security

- Federally taxable Social Security income

Retirement Income

- Pension Exclusion:
 - If taxpayer is 65 or over OR totally disabled OR spouse is totally disabled AND taxpayer received amounts from "employee retirement system" (i.e. 401(k); 403(b); 457) can deduct a maximum amount per year in the following table:

Year	Amount
2012	\$27,100.00
2013	\$27,800.00
2014	\$29,000.00
2015	\$29,200.00
2016	\$29,400.00
2017	\$29,900.00
2018	\$30,600.00
2019+	\$31,100.00

(per person, for all filing statuses, indexed) less total social security payments received (not just taxable portion) (IRA, Roth IRA, SEP, Keogh, or ineligible deferred compensation do not apply).

US obligations

- Interest on US obligations (T-Bills, US Savings Bonds).

Standard/Itemized deductions

- If the standard deduction is taken federally, then the standard deduction must be taken at the state level.
- If deductions were itemized federally, the deduction that benefits the taxpayer most (standard or itemized) may be taken at the state level.
 - Standard Deduction is 15% of AGI subject to the following filing status limitations (figures are not indexed):
 - For Single and MFS:
 - Maximum of \$2,250
 - For MFJ & HOH:
 - Maximum of \$4,500
 - Itemized Deduction
 - Same as Federal Itemized deduction, less State Income Taxes due.
 - Pro-rata portion of federal phase-out must be applied to state income taxes—all filing statuses.

Personal Exemption

- The following exemptions apply to all filing statuses:

Year	Amount	Additional for 65+ (head) or blind
2002-2007	\$2,400.00	\$1,000.00
2008-2018	\$3,200.00	\$1,000.00
2019+	Not Indexed	Not Indexed

- One each for self and spouse, and each dependent

- \$3,200 for each dependent that is over 65
- Exemption phase-out:

Federal AGI	Single/MFS	MFJ/HOH
< \$100,000.00	\$3,200.00	\$3,200.00
\$100,001.00 - \$125,000.00	\$1,600.00	\$3,200.00
\$125,001.00 - \$150,000.00	\$800.00	\$3,200.00
\$150,001.00 - \$175,000.00	\$0.00	\$1,600.00
\$175,001.00 - \$200,000.00	\$0.00	\$800.00
> \$200,000.00	\$0.00	\$0.00

The phase-out affects the amount for all exemptions.

Example: Single filer with 4 exemptions and \$50,000 AGI, the exemption amount will be $\$3,200 * 4 = \$12,800$. For the same filer with AGI of \$110,000 it would be $4 * \$1,600 = \$6,400$. This does not affect the additional exemption for age 65+.

Tax credits

Non-refundable

- Child and dependent care credit (MFS has different rules).

Dependent Exemptions:

- \$1,000 (**not** indexed) for each dependent under 19 or aged 19 to 24 and attending school
- \$700 (**not** indexed) age exemption for each head 65 or over
- Medical and dental exemption—deductible amount from Schedule A (i.e. amount in excess of 7.5% limitation)

Estate Exemption:

- Updated to \$2,000,000 for 2024([source](#)).

Michigan

Last reviewed: June 2024

Template A

State additions

Tax-free income

- Tax-free asset income for non-Michigan municipals

Other

- Michigan does not allow the Self-Employment Tax deduction, which is allowed for the Federal Tax calculation.
 - If this deduction (labeled "Net Self Employment") was allowed in the calculation of the Federal AGI, then the same amount will be added back when calculating the State AGI.

State subtractions

US obligations

- Interest on US obligations (T-Bills, US Savings Bonds).

Retirement income

- Pension Benefit Subtraction
 - Michigan does not tax distributions from qualified retirement plans (i.e. defined benefit or defined contributions), including plans for the self-employed. There is a limit to this subtraction, as follows:
 1. All public pension benefits (excluding Social Security) can be deducted if only public pension benefits are received (i.e. State of Michigan, Michigan local governments, federal civil service, and military retirement). *These are not distinguished in Digital Planning by InvestCloud.*
 2. The lesser of the amounts in the table below or the private pension amounts, if only private pension benefits received.
 3. If both public and private pensions are received, then see state worksheet for calculation (*Digital Planning by InvestCloud does not distinguish between public and private*).
 4. IRAs, Defined Benefit pensions, KEOGHs and Gen self-employed are deductible in Digital Planning by InvestCloud.

- Maximum benefits to be subtracted:

Year	Single, MFS, & HOH	MFJ
2012	\$47,309.00	\$94,618.00
2013	\$48,302.00	\$96,605.00

- As of 2012, the Pension Benefit Subtraction has changed in the following ways (note that joint filers should use the age of the oldest taxpayer to determine which category to apply).
 - Taxpayers born before 1946:
 - No change.
 - Taxpayers born 1946 to 1952:
 - Not eligible for income exemption when total household resources exceeded \$75,000 for MFS, Single, HOH or > \$150,000 for MFJ
 - Younger than 67: Pension subtraction is limited to \$20,000 for Single/MFS/HOH and \$40,000 for MFJ (*not indexed*).
 - 67 or older: Subtraction applied to ALL income of \$20,000 for Single/MFS/HOH and \$40,000 for MFJ (*not indexed*). Social Security is not exempt (*see below*).
 - Taxpayers born after 1952:
 - Younger than 67: No subtraction allowed.
 - 67 or older: Subtraction applied to all income of \$20,000 for Single/MFS/HH and \$40,000 for MFJ (*not indexed*). Social Security is not exempt (*see below*). Personal exemptions are no longer allowed.

Other

- Senior citizens subtraction:
 - If either heads are over the age of 65, they are eligible for this subtraction.
 - As of 2012, this no longer applies to anyone born in 1946 or later.
 - Joint filers should use the age of the oldest taxpayer to determine this.
- Maximum subtraction:

Year	Single, MFS, & HOH	MFJ
2011	\$10,218.00	\$20,437.00
2012	\$10,545.00	\$21,091.00

Social Security

- As of 2014, a person born in 1946 through 1952 (age 62-68) who receives Social security, the deduction is limited to \$35,000 for single returns or \$55,000 for joint returns. If both spouses receive such payments, the deduction is increased to \$70,000 for joint returns. After the taxpayer reaches age 67, this deduction does not apply. Instead, the taxpayer is eligible for a deduction of \$35,000 for single returns. If one spouse is in this age range and filing status is MFJ, the deduction is \$55,000. If both spouses are in this age range for joint returns, it is \$70,000; this deduction is available against all types of income. This continues for all future years and figures are not indexed.

Personal exemptions

- The following exemptions are allowed for Michigan:
- An exemption for each family head and each dependent as follows (indexed for inflation):
 - As of 2012, no personal exemptions are allowed for taxpayers who are born after 1952 and age 67+.

Year	Amount
2014-2017	\$4,000.00

Tax credits

Refundable

- Homestead Property Tax Credit:
 - The AGI limit applies for all filing statuses (not indexed for inflation).
 - MFS filers
 - Credit must be calculated as if they were filing jointly (i.e. only one claim per couple). The income of both must be combined, and then the credit can be split between the two.
 - Each person can use their own expenses only. For joint expenses, the expense will be split 50/50.

Tax rates

- Michigan has a flat income tax rate:

Rate
4.25%

Total

Definition of Dependent =N/A

State additions:

Tax-free income

- Tax-free asset income for non-Minnesota municipals

State taxes

- State income taxes
- Different values for HOH & MFS

State subtractions:

US obligations

- US obligation interest

Charitable Contributions over \$500 (for all filing statuses):

- This subtraction may be taken only if the standard deduction was taken federally and the taxpayer has charitable contributions over \$500 (not indexed)

Age 65 or Over/Disabled subtraction

A family head must be permanently and totally disabled. Since we cannot determine this, we will treat it only as an age subtraction

- Use the following table to determine if the taxpayer is eligible for this subtraction (amounts still valid):

- This deduction is not available for MFS status in Digital Planning by InvestCloud (because Digital Planning by InvestCloud assumes spouses are living together). Figures not indexed.

Taxpayer Status	Federal AGI is Less Than:	Non-taxable Social Security Benefits are Less Than:
MFJ and both spouses are 65 or older	\$42,000.00	\$12,000.00
MFJ and one spouse is 65 or older	\$38,500.00	\$12,000.00
Single and HOH	\$33,700.00	\$9,600.00

Social Security

- Social Security income may be subtracted depending on filing status and provisional income. Provisional income is Minnesota AGI plus any tax-exempt interest and one half of Social Security income.

If your filing status is	And your provisional income is	Your maximum subtraction is
Married filing joint or qualifying widow(er)	Less than \$88,630	\$5,290

Template A

- Non-Mississippi municipals are added back.

State subtractions

Social Security

Exclusion from gross income allowed for all benefits. Mississippi income starts at the Federal level and, therefore, no adjustment is needed. However, Social Security income is included for Federal purposes in certain cases (such as if earned income is too high); this leads to the inclusion of Social Security income in state AGI. This needs to be excluded as Social Security is not taxable for Mississippi purposes.

Retirement Income

Mississippi exempts most forms of retirement income including from retirement accounts (401k, IRA, etc.) as well as pension income.

Standard deduction

Year	Single	MFJ	MFS	HOH
1999-2019	\$2,300.00	\$4,600.00	\$2,300.00	\$3,400.00
2020+	Not indexed	Not indexed	Not indexed	Not indexed

Personal exemption

- \$1,500 exemption per total number of child or parent dependent(s). This does not include the taxpayers.
- One exemption for each taxpayer or spouse who is blind or over the age of 65 (up to a maximum of 4).
- Added to the personal exemption is one of the following amounts, depending on filing status:

Year	Single	MFJ	MFS*	HOH
2013-2019	\$6,000.00	\$12,000.00	\$12,000.00 total: \$6,000.00 each	\$9,500.00
2020+	Not Indexed	Not Indexed	Not Indexed	Not Indexed

*MFS must take half of the personal exemption total (including personal exemptions).

- **Example:** MFJ (2 heads) with 2 children dependents and one head is over age 65:

- 3 exemptions of \$1,500 = \$4,500 plus
- Additional exemption amount of \$12,000 equals
- Total of \$16,500 in exemptions
 - For MFS, this would be \$8,250 (half of the total).

Social Security

Exclusion from gross income allowed for all benefits. Missouri income starts at the Federal level and, therefore, no adjustment is needed. However, Social Security income is included for Federal purposes in certain cases (such as if earned income is too high); this leads to the inclusion of Social Security income in state AGI. This needs to be excluded as Social Security is not taxable for Missouri purposes.

Dependent deduction

- \$1,200 each for all dependents listed on the federal form, plus:
 - \$1,000 each for dependents over age 65 who do not receive Medicaid or state funding.

Federal Tax Deduction

- Federal Tax Deduction - tax years before 2019: An additional subtraction for Missouri purposes is the amount of Federal income tax that the client or clients paid. The deduction is limited to \$5,000 for all filing statuses except MFJ, which is then limited to \$10,000. The amount deducted is this: Regular federal tax + AMT. This cannot be below \$0.
 - http://dor.mo.gov/forms/4282_2015.pdf
- Federal Tax Deduction – tax years 2019 and later
 - Missouri allows a deduction for a percentage of a taxpayer's federal income tax liability paid within the tax year. The deduction may not exceed \$5,000 (per taxpayer).
 - For years 2019 and on the percentage allowed as a deduction is as follows:
 - 35% for incomes of \$25,000 or less
 - 25% for incomes from 25,001 to \$50,000
 - 15% for incomes from 50,001 to 100,000
 - 5% for incomes from 100,001 to \$125,000
 - 0% for incomes above \$125,000

Standard/Itemized deductions

- Missouri allows taxpayers to take the larger of standard or itemized deductions.
 - Standard Deduction (*same as Federal*):

Year	Single & MFS	MFJ	HOH
2012	\$5,950.00	\$11,900.00	\$8,700.00
2013	\$6,100.00	\$12,200.00	\$8,950.00

2017	\$6,350.00	\$12,700.00	\$9,350.00
2018+	Same as federal	Same as federal	Same as federal

Additional \$1,500 for blind or over 65 years old for head 1 or head 2. Additional \$1,850 for over 65 years old for Head of Household.

- Itemized Deductions: Determined by Part II of Form MO-A:
 1. Total federal itemized deductions.
 2. Plus all social security and Medicare taxes paid by both spouses from employment income. This is the total of all Medicare and social security from both employment and self-employment. It is limited to \$7,347 for 2015+ (\$6,621.60 for 2014, \$4,624 for 2012 & \$7,049 for 2013). This is the same amount as the maximum amount of social security tax from earnings and is subject to inflation.
 3. Plus any self-employment tax: This is the net amount of self-employment tax (line 56 form 1040) less deductible part of self-employment tax (line 27 form 1040).
 4. Less state and local income taxes.
 5. Equals Missouri Itemized deductions.

Standard/Itemized deductions

Montana allows taxpayers to take the larger of standard or itemized deductions.

Standard: There is a calculation for Montana's standard deduction that we have not yet incorporated into Digital Planning by InvestCloud. Up through 2011, we have used the figures in the first table below, which in reality are just part of the Montana standard deduction calculation.

- Montana allows taxpayers to take the larger of standard or itemized deductions.
 - Standard Deduction Calculation (*added to Digital Planning by InvestCloud in 2012*):
 1. Montana Adjusted AGI (In Digital Planning by InvestCloud, this is the Federal AGI plus State Additions, less State Subtractions).
 2. Multiply by 20% to find X.
 3. Take the lesser of X above or the number from the table below, based on filing status:

Year	Single & MFS	MFJ & HOH
2012	\$4,200.00	\$8,400.00
2013	\$4,270.00	\$8,540.00
2014-2015	\$4,370.00	\$8,740.00
2016	\$4,460.00	\$8,920.00
2017	\$4,510.00	\$9,020.00
2018	\$4,580.00	\$9,160.00
2019	\$4,710.00	\$9,420.00
2020	\$4,790.00	\$9,580.00
2021	\$4,830.00	\$9,660.00

2023	\$5,540.00	\$11,080.00
2024+	Indexed	Indexed

4. Take the greater of number 3 above or minimum deduction from the table below. This is the standard deduction:

Year	Single & MFS	MFJ & HOH
2012	\$1,860.00	\$3,720.00
2013	\$1,900.00	\$3,800.00
2014-2015	\$1,940.00	\$3,880.00
2016	\$1,980.00	\$3,960.00
2017	\$2,000.00	\$4,000.00
2018	\$2,030.00	\$4,060.00
2019	\$2,090.00	\$4,180.00
2020	\$2,130.00	\$4,260.00
2021	\$2,140.00	\$4,260.00
2022	\$2,260.00	\$5,090.00
2023	\$2,460.00	\$4,920.00
2024+	Indexed	Indexed

- Itemized: Montana itemized deductions are total Federal itemized deductions with the following adjustments:
 - Subtract: MT state income taxes.
 - Add: Federal income taxes paid in the current year – this is limited to \$5,000 for Single, HOH, and MFS or \$10,000 for MFJ.
 - The itemized deduction for medical expenses is calculated the same as it is for Federal if the individual was born before January 2, 1949. If born later, the Federal medical deduction is reduced by 2.5% of federal AGI to a minimum of \$0 for Montana purposes.

State subtractions

Social Security

Social Security benefits included in federal adjusted gross income are subtracted when computing Nebraska taxable income:

- for married taxpayers filing a joint return, federal adjusted gross income is \$58,000 or less; or
- for taxpayers filing any other return, federal adjusted gross income is \$43,000 or less.

Standard deduction

For tax years 2003 the allowable standard deduction is the lesser of the federal standard deduction allowed or the standard listed in the Nebraska Revised States Section 77-2716.01 which states the following:

Year	Single	MFJ	HOH	MFS
2012	\$5,950.00	\$11,900.00	\$8,700.00	\$5,950.00

For tax years beginning or deemed to begin on or after January 1, 2004, the standard deduction amounts, including the additional standard deduction amounts above shall be adjusted for inflation by the method provided in section 151 of the Internal Revenue Code of 1986, as amended. **If any amount is not a multiple of ten dollars, the amount shall be rounded to the next highest multiple of ten dollars except that the standard deduction for the married filing separately**

taxpayers may be a multiple of five dollars. Beginning tax year 2006, the phase-out of the standard deduction was eliminated.

Additional deduction for each head that is 65 or older, or blind:

Total income

New Jersey uses the Federal definition for total income.

State additions

Tax-free income

- Interest from non-NJ municipals

Other

- Contributions to qualified 457, SEP, and 403b plans, and other plans that defer salary for Federal Tax purposes, not including 401(k) plans
- New Jersey does not conform to the subtraction of HSA contributions. Therefore, Digital Planning by InvestCloud will add back these contributions into gross income.

State subtractions:

US obligations

- Interest on US obligations (T-Bills, US Savings Bonds).

Social Security

- Federally taxable Social Security income.

Other

- Disability Insurance Income
- Unemployment Income

Retirement income

- New Jersey Pension exclusion
 - To qualify for this exclusion, the taxpayer must be 62 or over, retired, and disabled. For married taxpayers, if only one spouse qualifies, only the qualified retirement income for that spouse may be included in this calculation
 - Starting in 2005, the taxpayer's gross income before any subtractions must also not exceed \$100,000 (not indexed) to qualify for this exclusion (<http://www.state.nj.us/treasury/taxation/njit7.shtml>)

- The subtraction is the minimum of taxable retirement income and the maximum pension exclusion from the table below

Taxable retirement income consists of the taxable portion of the following:

- IRA distributions
- Pension Income (401(k), 403(b), etc.)
- Annuity Income
- Maximum Pension Exclusion (not indexed)

Year	Single & HOH	MFJ	MFS
2017	\$30,000.00	\$40,000.00	\$20,000.00

2021+	\$75,000.00	\$100,000.00	\$50,000.00

Standard/Itemized: there are no standard or itemized deductions

- Medical Expenses/Medical Savings Account Contribution deduction
 - (Basically expenses in excess of 2% of state income)
- Alimony
- Residential property tax deduction
- The taxpayer must meet the following criteria:
 - Resided in NJ as homeowner or tenant as principal residence.
 - Property taxes must have been paid either by the homeowner or as a tenant .
 - New Jersey Total income less state subtractions plus state additions must be more than the amount shown in the table below, **or** one of the family heads is 65 or over, disabled or blind.
 - Resident homeowners and tenants may deduct their residential property taxes. Tenant deduction is equal to 18% of rent paid during the year (pass as we can't determine the source of the rent). *Beginning with the 1998 tax year*, the entire amount of property tax paid up to \$10,000 may be deducted. In lieu of the deduction, taxpayers may elect to claim a \$50 refundable credit.
 - The deduction is the minimum of property taxes paid and \$15,000.
 - The property tax paid for purposes of the calculations for the year must be split between head 1 and head 2 for MFS
 - The taxpayer has the option of taking this deduction or a refundable credit. **However**, at this time our application cannot determine whether the deduction has already been taken at the time when the credits are calculated. For now, **we will always assume that the deduction should be taken.**

- For tax years beginning in 2009, the property tax deduction is limited to \$5,000 for taxpayers with a gross income of more than \$150,000, but not exceeding \$250,000. Taxpayers with a gross income of more than \$250,000 are not allowed a property tax deduction. These limitations are inapplicable for taxpayers who are 65 years old at the end of the taxable year or blind or disabled.
- For tax years after 2009, the eligibility for the property tax deduction is not limited by income.
- The taxpayer must meet the following criteria:
 - Resided in NJ as homeowner or tenant as principal residence, we can't determine, but will assume as long as state of NJ selected that can qualify
 - Property taxes must have been paid either by the homeowner or as a tenant
 - New Jersey Total income less state subtractions plus state additions must be more than the amount shown in the table below, **or** one of the family heads is 65 or over, disabled or blind.
 - Resident homeowners and tenants may deduct their residential property taxes. Tenant deduction is equal to 18% of rent paid during the year (pass as we can't determine the source of the rent). *Beginning with the 1998 tax year*, the entire amount of property tax paid up to \$10,000 may be deducted. In lieu of the deduction, taxpayers may elect to claim a \$50 refundable credit.
 - The deduction is the minimum of property taxes paid and \$15,000.
 - The property tax paid for purposes of the calculations for the year must be split between head 1 and head 2 for MFS
 - The taxpayer has the option of taking this deduction or a refundable credit. **However**, at this time our application cannot determine whether the deduction has already been taken at the time when the credits are calculated. For now, **we will always assume that the deduction should be taken.**
 - For tax years beginning in 2009, the property tax deduction is limited to \$5,000 for taxpayers with a gross income of more than \$150,000, but not exceeding \$250,000. Taxpayers with a gross income of more than \$250,000 are not allowed a property tax deduction. These limitations are inapplicable for taxpayers who are 65 years old at the end of the taxable year or blind or disabled.
 - For tax years after 2009, the eligibility for the property tax deduction is not limited by income.

Personal exemptions

- \$1,500 per dependent (**not indexed**)
- \$1,000 for each of the following (**not indexed**):
 - Each head
 - Each head who is 65 or over

- Each head who is blind (Digital Planning by InvestCloud currently does not support this yet) or disabled
- Each dependent under 22 years of age who is a student. New Jersey follows the federal rules for the definition of dependent. There should be an additional \$1,000 until the client reaches 22. Children over 18 and going to school are entitled to both the dependency exemption and the special student exemption.

Taxable income

If New Jersey Total Income less state subtractions plus state additions is below the thresholds shown below, no state tax is due (not indexed):

State additions

Tax-free income

- Tax-free asset income for non-New York municipals

State subtractions

US obligations

- Interest on US obligations (T-Bills, US Savings Bonds).

Social Security

- Federally taxable Social Security income.

Retirement Income:

The first \$20,000 of retirement income received by an individual is subtracted from federal adjusted gross income to determine New York adjusted gross income if the payment is:

- received by an individual at least 59 1/2 years old;
- includible in gross income for federal tax purposes;
- Married taxpayers may each take the full \$20,000 subtraction if they qualify, for a maximum subtraction of \$40,000 if the couple files jointly.

Standard/Itemized deductions

If Federal Standard Deductions were taken, New York Standard Deduction must be taken as well.

Standard or itemized deductions

If you took federal standard deduction, then you have to take NY standard deduction

Standard deduction (not indexed):

- Adjusted total itemized deductions:
 - Itemized
 - Same as Federal, except Taxes Paid excludes state taxes
 - Same itemized deduction phase-out AGI limits as federal
 - For tax years 2010, 2011 and 2012, for AGI over \$10,000,000, the NY itemized deduction is limited to 25% of the federal itemized deduction for charitable contributions. No other federal itemized deductions of the taxpayer will be allowed for NY purposes.

Personal Exemption

- \$1,000 for each dependent (not indexed) (no exemption for Head 1 or Head 2) All filing statuses.

Tax Credits

Refundable

- Child and Dependent Care Credit - this is a portion of the Federal Credit. N/A for MFS in Digital Planning by InvestCloud because Digital Planning by InvestCloud assumes clients live together
 - Dependent care credit is n/a if Federal AGI is > \$30,000
- College Tuition Credit (starting in 2001) - for all filing statuses
 - The credit will be phased in starting in 2001 and will be completely phased in for the 2004 tax year.
 - The logic for this credit needs to be fixed to account for the \$10,000 maximum

Non-refundable

- Household Credit
 - Based on Federal AGI and size of household.

Tax credits

Non-refundable

- Retirement income credit – based on total pension income, not including social security income. The taxpayer must be retired in order to receive the credit. The credit amounts are not indexed, neither are the income levels

Pension Income (amount of qualifying retirement income)	Credit
< \$500.00	\$0
\$501.00 – \$1,500.00	\$25.00
\$1,501.00 – \$3,000.00	\$50.00

\$5,001.00 – \$8,000.00	\$130.00
> \$8,000.00	\$200.00

- Senior Citizens Credit - One credit of \$50 if either or both heads are 65 or over (i.e. one credit per return, MFS, S, HH each get a credit of \$50, MFJ just the one credit of \$50 for both heads if qualifications met). For taxable years beginning an. 1, 2015, taxpayers with adjusted gross income of \$100,000 or more, on their individual or joint returns, are not allowed to claim the credit.
- Child and dependent care credit for all filing statuses
 - Available to taxpayers whose State AGI is \$40,000 or less (not indexed) and who made payments that qualified for the federal Child and Dependent Care Credit
 - If State AGI is less than \$20,000 (not indexed), it is the same as the Federal Child Care credit
 - If State AGI is between \$20,000 and less than \$40,000 (not indexed), the credit is 25% of the Federal Credit
- Exemption Credit: \$20 (not indexed) for each head and each dependent for all filing statuses. The credit is available only to households with Ohio taxable income of less than \$30,000.
- Joint filing credit (N/A for MFS):
- Taxpayer qualifies for this credit if each head has a qualifying Ohio adjusted gross income of \$500 (not indexed) or more. The qualifying income does not include investment income including rents and capital gains, and royalties. The credit is calculated as follows:

1. State taxes due less all previous credits (if this value is \$0 or less, there is no Joint Filing Credit)
2. Adjustment percentage, taken from the following table. The information in this table is not indexed to inflation. Note that the percentage is based on State Taxable Income.
3. Line 1 * Line 2
4. The credit is limited to a maximum of \$650 (not indexed)

If your state taxable income is:	Adjustment Percentage:
Less than or equal to \$25,000.00	20%
Greater than \$25,000.00 but not more than \$50,000.00	15%

NOTE: There is a more robust calculation method in the Oregon form 40-IT instructions that determine the actual amount. The amounts above are being used, although they are merely maximums and not the actual amount.

Social security

- Federally Taxable Social Security income
- Oregon does not tax Social Security benefits. Any Social Security benefits included in your federal adjusted gross income are subtracted on your Oregon return

Oregon medical subtraction

- Formerly a deduction, add the Oregon Medical Deduction to the subtraction, for all filing statuses
 - Federal AGI must be \$200,000 or less for MFJ/HOH or \$100,000 or less for other status'
 - At least one family head must be 63 or over at the end of the tax year
 - Subtract the State Income Taxes portion of the Taxes You Paid Federal itemized deduction. If the Federal itemized deduction was phased out, see the tax worksheet for calculation.

Standard/Itemized

- The larger of the standard deduction or total itemized deductions (not limited to federal filing choice) (Indexed annually)

- Additional deduction of \$1,200 for single filers or \$1,000 for joint filers, \$1,000 for MFS and \$1,200 for HH (not indexed) for:
 - each family head who is blind
 - each family head who is 65 or over, for a maximum of four additional deductions.

- Itemized Deductions. Same as Federal Itemized deduction including phaseout, with the following modifications:
 - Add the Oregon Medical Deduction to itemized, for all filing statuses
 - Available if the itemized deduction is taken for Oregon.
 - At least one family head must be 62 or over at the end of the tax year
 - Subtract the State Income Taxes portion of the Taxes You Paid Federal itemized deduction. If the Federal itemized deduction was phased out, see the tax worksheet for calculation.

Personal exemptions (in Oregon this is a non-refundable tax credit)

2025+	Indexed	Indexed	Indexed	Indexed

The standard deduction is phased out for any taxpayer who's AGI for Rhode Island exceeds \$217,050 for 2022 (indexed for future years). It is the same calculation as the one for personal exemptions.

Itemized deductions are not allowed.

Personal Exemption

- Multiply the number of Federal exemptions by the following amount:

Year	Amount
2014	\$3,800.00
2015	\$3,850.00
2016	\$3,900.00
2017	\$3,900.00
2018	\$4,000.00
2019	\$4,100.00
2020	\$4,150.00

Year	Amount
2021	\$4,250.00
2022	\$4,350.00
2023	\$4,700.00
2024	\$4,950.00
2025+	Indexed

Phase-out: The personal exemption is phased out for taxpayers whose Rhode Island adjusted gross incomes exceed \$217,050 to \$241,850. The calculation is as follows for 2022:

- Step 1: Multiply \$4,350 (indexed) by the total number of exemptions.
- Step 2: Subtract \$217,050 from the client's Rhode Island AGI (regardless of filing status). If this amount is greater than \$24,800 ($\$6,200 * 4$), then the exemption amount is \$0. These dollar figures should be indexed.
- Step 3: Take amount from step 2 and divide by \$6,200 (also should be indexed). If the result is not a whole number, increase it to the next whole number (i.e. .013 rounds up to 1).
- Step 4: Multiply the amount from step 1 by a fraction determined in the following table (not indexed). This is the exemption amount.

Step 3 Result:	Multiply Step 1 by:
1	0.80
2	0.60
3	0.40
4	0.20

South Carolina

Last reviewed: June 2024

Template B

Non-South Carolina municipals are added back.

State additions

- State tax adjustment
 - For South Carolina, there is a special add-back for SC taxable income if SC state tax is used in the Federal itemized deduction. The calculation is as follows:
 1. Itemized deductions from current year Federal return.
 2. Enter allowable Federal standard deduction you would have been allowed if you had not itemized. Enter zero if MFS.
 3. Subtract the second number from the first. This should be the excess of itemized deductions over what the standard would have been.
 4. Enter the amount of state income taxes.
 5. Take the lesser of the total for step 3 or step 4. This is added back to SC taxable income.
 - This adjustment should be entered on the line item for state taxes under state additions.
 - The calculation will be iterative, as the addition will increase SC state tax, thus reducing the Federal deduction. The increase in SC state tax continues this loop until the effects diminish.

State subtractions:

- Social Security subtraction (no age restriction)
 - No Social Security income is taxed at the state level in SC
- Under Age 65
 - Taxpayers may exclude \$3000 of qualified retirement income
- Age 65
 - After age 65, the above \$3000 turns into \$15,000 that can be used for any income type.
 - Up to \$10,000 is used for qualified retirement income
 - The remainder of the \$15,000 is used for all other income types
 - Taxpayers always get the full \$15,000.

- So for example, if you only have \$8000 of retirement income, Digital Planning by InvestCloud will show an \$8000 retirement income subtraction and a \$7000 other subtraction in the Detailed Income Tax report.

Standard deduction and personal exemption

- Since starting point is federal taxable income, this is not applicable. Rates are just applied to Federal Taxable Income.

- The starting point is federal taxable income with minor adjustments that we don't support, rates are just applied to Federal Taxable Income

Tax

Multiply Utah taxable income by 4.55%.

Tax credits

- Non-refundable:
 - Exemption & Deduction Credit: not supported yet. For Utah, the amount of income tax is taken by starting with Federal AGI, making a few unsupported adjustments and then reducing the Utah tax by the following:

1. Personal exemptions

Number of exemptions: an exemption is counted for each head, each dependent, and each dependent with a disability (not supported). Definitions are the same as Federal, so just use that figure.

Calculation: Multiply the number of exemptions by the following:

Year	Amount
2012	\$2,850.00
2013	\$2,925.00
2014	\$2,963.00
2015	\$3,000.00
2016	\$3,038.00
2017	\$3,038.00
2018+	\$0

Under current legislation, Utah's personal exemption 75 percent of the federal exemption plus an additional 75 percent of the amount deducted as a personal exemption on the taxpayer's federal return for the taxable year regarding each disabled dependent adult or disabled dependent child and the federal personal exemption has been eliminated, we are assuming Utah's personal exemption will be eliminated.

2. Plus: Standard/Itemized Deduction
Use either the Federal standard or itemized deduction.
3. Less: State income tax deducted as an itemized deduction for Federal purposes

4. Multiply the result by 6%.
5. Take Utah taxable income and subtract the following (based on filing status, and these amounts are indexed):
 - a. For 2025: If filing Single/MFS, use \$16,472; HoH use \$25,114; MFJ use \$33,484.
6. Multiply step 5 by 1.3%.
7. Subtract the result from step 6 from step 4 (minimum of 0). If positive, this is the taxpayer tax credit (nonrefundable). Subtract this amount from the Utah tax calculated in Part I above.

Tax rates

- All taxpayers pay a flat rate of 4.55%

 - AGI = \$0 - \$60,000 Full Exemption
 - AGI = \$60,001 - \$69,999 Partial (See Below)
 - AGI >=\$70,000 No Exemption

Phaseout/Partial Exemption

The following are eligible for a partial exemption of taxable Social Security benefits:

- Filers who are single, married filing separately, and head of household filers earning between \$45,000-\$55,000
- Filers who are married filing jointly earning between \$60,000-\$70,000 are eligible for a partial exemption of taxable Social Security benefits.

Here's how the partial exemption will be calculated:

1. Subtract the taxpayer's AGI from the top of the exemption threshold
 - Married Joint Filers: $\$70,000 - \text{AGI} = \text{Line 1}$
 - All Other Filers: $\$55,000 - \text{AGI} = \text{Line 1}$
2. Divide the amount from Line 1 by \$10,000. (This becomes line 2)
3. Multiply the amount on Line 2 by the taxable Social Security benefit. This is the amount of the partial exemption.

- 65 or older multiplied by \$250
- Neither number is indexed

Taxable income

State Taxable Income = Federal AGI + State Additions – State Subtractions – Standard/Itemized – Personal Exemptions

Tax credits

Non-refundable

- Itemized Deduction Credit
 - Use the Itemized Deduction Credit Worksheet to calculate the credit. It uses itemized deductions, as they would be calculated at the Federal level. If deductions were not itemized for Federal taxation purposes, use the amounts that would be deductible if itemized deductions were used.
 - Use the standard deduction table near the end of the tax instructions to fill in the Wisconsin Standard Deduction row.
- Working Families Tax Credit
 - If Wisconsin Taxable Income (WTI) is \$9,000 MFS or less, this credit is equal to the tax due.
 - If WTI is more than \$9,000, but less than \$10,000 for MFS Filers.
 - If WTI is \$10,000 or more for MFS, no credit is allowed
 - The limits specified are not indexed.
- Married Couple Credit

- Credit is determined by taking 3% of the lesser of head 1's earned income, head 2's earned income, or \$16,000. Earned income includes regular earned income plus net profit from self-employment.

Other taxes

- Penalties on IRAs and other retirement plans:
 - 33% of Federal Penalty tax for early sale of registered assets
 - The Federal Penalty tax is shown besides the heading Penalty Taxes under Total Tax Calculation in the federal portion of the Income Tax Detail report.
